

Cognitive Walkthrough **Ezra Skwarka**

	1. Is the correct action obvious to the user	2. Does the description of the correct action match the user's intent	3. Does the user properly interpret the system's response?	Specific Notes
TASK: Use my recipe program				
Enter ingredients	yes	No, ezra tried to break it on purpose.	Yes, ezra demonstrated how to properly use my system	<p>Upon entering ingredients, the user wanted to break the system extremely hard. Hilarity ensued.</p> <p>User entered: 12 tapelspoon garlic garlic gar lic 7 seven seven the word ~ \\</p> <p>User tried to enter the entire bee movie script. Program crashed.</p> <p>User tried to enter "[]exit(nothing happened</p> <p>User tried to enter 18 new line characters. Nothing happened.</p> <p>Entering nothing as input gives no matches.</p> <p>tamado past gerlic o'lve o'l spinch chiccin nuggest sult peppa pikachu paninani vegan noodles vegan chocolate chocolate vegan wububububububububububu bubub this is not an analysis of how fun the game is that's</p>

				my input and now i'm done. User got a 350% match for vegan chocolate ganache
Click enter?	yes	yes	yes	User understood enter
Find top match	Yes	Yes	Yes	User understood top of the list = match
Find any other match	Yes	Yes	Yes	User understood that any % percentage = a match

General Observations:

User thought this was very funny.

Summary of Recommendations:

Column percent should be percentage matched and it should be all the way on the left.

User does not like seeing input.

User wants to see the matched ingredients.

User said: "user wants to make op cry".

It is worth noting the user is very computer literate.

User says "user knows *exactly* what they're doing. Exactly in italics."
